

# Metrics (Precision, Recall, F1)

Month 2: Classical Machine Learning | Week 6: Supervised Learning: Classification | Day 2

---

## Theory & Concepts

**Read:** Accuracy, Precision, Recall or F1? (10 min). Concept: Why accuracy fails on imbalanced data.

## Practice Exercises

**Python:** Calculate Accuracy, Precision, and Recall manually for your Iris model, then verify with `sklearn.metrics`.
